venureddy.vercel.app/ +91 6309343563 Hyderabad, India / Open to Relocate (Immediate Joiner)

PROFESSIONAL SUMMARY

Python full stack developer with hands-on experience implementing an ML- augmented recommendation engine serving over 10,000 records with 60% lower query latency and a CNN audio classification system achieving 89% accuracy at under 100ms edge inference. Recognized in the top 8% of 250,000 national applicants for the AlgoUniversity Tech Fellowship. Completed more than 500 LeetCode problems.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript (ES6+), SQL.
Backend: Django, Django REST Framework (DRF), REST APIs, JWT Authentication, Django ORM.
Frontend: React.js, HTML5, CSS3, Bootstrap, Responsive UI.
Databases & Caching: PostgreSQL, MySQL, Redis, Schema Design, Query Optimization, B-tree Indexing.
Machine Learning: TensorFlow, TFLite, Scikit-learn, CNN, Pandas, NumPy, Feature Engineering.
DevOps & Tools: PyTest, Docker, Docker Compose, Git, GitHub, GitHub Actions, CI/CD Pipelines.

TECHNICAL PROJECTS

Movie Recommendation Platform - Full Stack Python Developer 2024 - 2025

- Built an end-to-end ML-powered recommendation engine using content-based filtering (Pandas, Scikit-learn), serving personalized results through a Django REST Framework backend and React.js frontend.
- Designed a normalized PostgreSQL schema for 10,000+ records; applied Redis caching with B-tree indexing, reducing query latency by 60%.

AI-Driven Audio Triggered Threat Detection - Backend and Android Developer 2025 - 2026

- Architected a CNN-based real-time audio classification pipeline using TensorFlow, achieving 89% accuracy; deployed on Android via TFLite with sub-100ms on-device inference.
- Built automated SMS emergency alerts with live GPS location sharing, triggered on detection events for real-time emergency response.

Automation Platform - Python Developer 2025 - 2026

- Engineered a personal automation platform using Python and Playwright bots for system monitoring, health checks, and alert management, with shared libraries for code reuse across bots.
- Reduced manual job-search effort from hours to minutes per day, logging 200+ applications in the first month via automated job.applied events published to an event bus for downstream bots.

EDUCATION

Master of Computer Applications (AI & Machine Learning) — Galgotias University 2024 - 2026
CGPA: 7.46/10 | Coursework: Python, ML, Deep Learning, Artificial Intelligence, DSA.
Bachelor of Computer Science — Chaudhary Charan Singh University 2019 - 2022
Score: 85% | Coursework: Database Management System, Programming Fundamentals.

PROFESSIONAL TRAINING

Full Stack Python Developer Program - Besant Technologies 2023 - 2024
Completed 400+ hours of project-based training in Python, Django, DRF, React.js, and MySQL; delivered 3+ full-stack applications integrating ML models with production-ready APIs and frontends.

Digital Skills Readiness Program, Java Full Stack - Wipro TalentNext July 2025 - Oct 2025
Enterprise curriculum covering Java, Object-Oriented Programming (OOP), Data Structures & Algorithms, MySQL, and scalable API design with emphasis on algorithms and system architecture.

Achievements & Certifications

Solved 500+ LeetCode problems, using Sliding Window, Two Pointers, and Hash Tables.
Ranked top 8% of 250,000 participants nationally — AlgoUniversity Tech Fellowship 2025.
NPTEL: Artificial Intelligence — Concepts and Techniques — IIT/AICTE Recognized.
